Kit for the administration of oxygen and nitrous oxide a mixture (MEOPA)

A mild analgesia for short-term painful procedures

- **Safe**
- **Easy to use**
- **A complete range**

Application

Emergency or diagnostic procedures

Pediatrics

Adults

The use of nitrous oxide (50% O_2 + 50% N_2O) is increasingly common during short, painful medical procedures.
This gas has analgesic, pain-relieving, and anxiolytic effects.
Its effectiveness is optimal after 3-5 minutes of inhalation if the circuit is perfectly sealed. Its effect ceases as soon as insufflation is completed. It has no significant side effects.

The MEOPA set is ready to use and consists of:

- Connection hose to the nitrous oxide source
- Reservoir
- One-way valves
- Filter in the Performance version
- Extensible hose for exhaled gas evacuation

Advantages

- Improves safety
- Easy to use
- Comfortable for patients and staff

Standard Kit

Easy to use

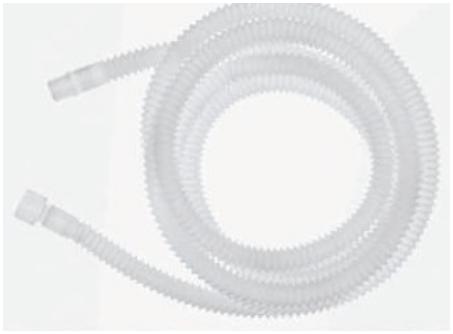

Reservoir color code:

Blue, pediatric

White, adult

Expandable hose from 1.5 to 5 m

Performance Kit

The filter protects and allows the Performance tubing to be reused for 7 days (regardless of the number of patients).

The Performance range features a blue T-connector to visually identify component compatibility.

Kit MEOPA standard

Item	Description	Units per box
KI/CM30-00-001	MEOPA adult circuit with 2-liter reservoir	50
KI/CM30-00-002	MEOPA pediatric circuit with 1-liter reservoir	50
KI/TACC500/30M	Expandable evacuation tube	20

Kit MEOPA Performance

Item	Description	Units per box
KI/CM30-00-001P	MEOPA adult circuit with 2-liter reservoir	50
KI/CM30-00-002P	MEOPA pediatric circuit with 1-liter reservoir	50
KI/TACC500/30MP	Expandable evacuation tube	10

- Non-sterile
- Kits are sold without evacuation tube.
